ABSTRACT (center and letter size 18)

<The abstract should summarize the case, problem addresses, the important results and the message it conveys. Length of abstract should be from 250 to 500 words. The abstract should have enough information of the whole report and should be as 1 paragraph (not a list) in 1 page only>.

Paragraph is set at 1.5 lines with 6 pt spacing before and after. Letter size is 13.

ACKNOWLEDGEMENTS (center and letter size 18)

To express the appreciation. Not specific guide but no more than 1 page.

Paragraph is set at 1.5 lines with 6 pt spacing before and after. Letter size is 13.

LIST OF ABBREVIATIONS (center and letter size 18)

BSC: Body condition score

SCC: Somatic cell counts

UHT: Ultra-high temperature

<Note: LIST OF ABBREVIATIONS must be in Alphabetical order. Use abbreviation for any terms used at least 2 times in the text. We do not need to write for some abbreviation which are very common such as cm, m, ^{o}C, …>

(Left align; letter size is 13; indentication is 0 cm

Space between ":" and the content would be 1 cm (2 of 1-cm tabs)

TABLE OF CONTENTS

(center and letter size 18)

LIST OF TABLES AND FIGURES (center and letter size 18)

Table 2.1

Table 2.2

CHAPTER 1

GENERAL INTRODUCTION (#1 page)

<**Introduction to the unit** (farm, small animal clinic, organization, …) is given by describing the general information, responsibilities of the unit, how it works, how it is organized, and so on. Then give a brief overview of **the problem that the case addresses**, citing relevant literature where necessary. The **objective of the case report** should be described>

Note: **citation** by using Zotero is recommended with American Psychological Association style

CHAPTER 2

MAIN WORK DURING THE STAY (#4 pages)

<describe **the activities** of the clinic/ farm and in the relating to those **the student directly participate**. In this part, student can also **summarize the data** during the period of working there. Among those data, **the 1-3 clinical case(s)** that will be selected and introduced in Chapter 4.>

CHAPTER 3

LITERATURE REVIEW (#3 pages)

<A **summary of existing literature that closely relates to the case report** will be put in this Chapter. This part describes the **theories** (definition, cause, pathogenesis, if possible) and **current research findings** on the case. Students may **not need to collect all the information** available but the content should show a **good organization and informative coverage**, it should be included the original and the current publication. This means the literature review would help as **guidelines or standard methods for diagnosing or treating** the patient's condition which will be mentioned in the next Chapter>

CHAPTER 4

CASE REPORT

(# 5-9 pages)

<From the work described in Chapter 2, pick up **1-3 cases** that students find to be special, typical, and/or interested of the disease/ condition. This section provides the details of the case in the following order: (1) **Patient detailed description. (2) Case history. (3) Physical examination results. (4) Results of lab tests and other investigations. (5) Treatment regimen and plan. (6) Prognosis (7) Actual outcome. (8) Discussion (1 case…; 3 case…). (9) Conclusion**>

REFERENCES

(Using Zotero is recommended with APA (American Psychological Association) style (7th) to list the different types of reference as follow

This part is formated as **single line spacing** and 0 for before and after paragraph)
